

## NEXT GENERATION RESPONSES FOR YOUTH SURVIVORS OF HUMAN TRAFFICKING

### Risk Factor Nexus

With the understanding that **disclosure is the result of years of support and treatment**, CACs identify youth with **multiple life factors** commonly exploited by traffickers **to provide services to high-risk, actively groomed, and non-disclosing youth being trafficked.**

### Increasing Early Access

**Ohio CACs have served 402** children since 2016 have seen **continued to see an increase** in the **number of at-risk and trafficked youth served.** By intervening prior to disclosure CACs are **increasing early access to care.**

### Deep Statistical Insights

ONCAC is working with Child Advocacy Centers to build a more complete picture of the trafficking of youth in our communities. Through the **development of a comprehensive database** CACs will be able to track new outcomes measures and **use advanced statistics to inform enhanced MDT practice.**

### Innovative HT Specific Care

Advanced trainings provide Multi-Disciplinary Team members with **distinct psycho-educational curriculums for at-risk youth, survivors of trafficking, and transitional age youth**, all of which can be paired with evidence-based mental health care.

### Technology and National Resources

Since 2014, CACs provided 313 community and professional HT trainings to 8,306 individuals. Additionally, leveraging webinar technologies, ONCAC convened leading experts across disciplines to share promising and innovative responses to human trafficking via the ONtarget series. **ONtarget will return this year.**
